## MEDICARE TURNS 50 National Day of Action July 30, 2015!

We need to protect and improve Medicare as the highly successful public program it has been for nearly 50 years — and extend its coverage to all.

- Seniors, people with disabilities, and those struggling to make ends meet have been saved from financial ruin and provided access to care through Medicare and Medicaid.
- There have been attacks on Medicare that have weakened it — most of those problems have been caused by private health insurance interests.
- Along with improving and protecting Medicare, we need to expand it to cover everyone as the most cost-effective way to provide a single standard of high-quality care for all without financial barriers.

*Healthcare is a Human Right!*
